DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: In the Specification, page 2, line 11, "is" has been deleted; page 10, line 14, "EFT" has been changed to –FET--; page 11, line 11, "sucha" changed to –such--; page 15, line 8, "base" changed to –based--.

In the Drawings, Figures 5-7 have been labeled as –PRIOR ART--.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a lamp lighting apparatus having, inter alia, a delay element being provided between the input terminal and the operating voltage input (claims 1 and 7). The remaining claims 2-6 and 8-13 are allowed by virtue of their dependencies on the independent claims. Hence, the examiner has allowed claims 1 through 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Art Unit: 2828

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tereda et al., Patent No. 6,710,555; Nishimura et al., Patent No. 6,614,185; Okamoto et al., Patent No. 6,483,253; Kobayashi, Patent No. 6,646,389; Maruyama, Patent No. JP 2002164184 A.

None of the above patents discloses the delay element as recited.
